## EXPERIENCE (10+ YEARS)

---

<b>Staff Fullstack Engineer</b> ONMoon LLC	Sept 2015 — Present <i>Remote</i>
---	--------------------------------------

- **Fullstack:** For latest 8 years, I've been creating and managing projects for gambling industry on all stages of development, from MVP to production. I've been working with all types of projects, from small teams to big companies with 100+ employees.
- **Legacy code maintenance:** Led engineering of high-loaded gambling projects, resulting in 60% increase in user engagement by transforming legacy PHP project into scalable, high performance multi-project engine.
- **Management, Leadership:** Invented SkinPay and built, an innovative platform for instant selling of in-game skins with immediate payment receipt, leading to 40% upsurge in revenue.
- **Payment processing:** Built a robust payment system that processed over 1.5 million transactions and connected seamlessly with 40+ different partner APIs.
- **DevOps:** Migrated entire project infrastructure from dedicated servers to Google Cloud Platform, including databases and instances; showcased expertise in cloud technologies (AWS, GCP) and achieved seamless transition with zero downtime, reducing operational costs by 40
- **High load:** Contributed significantly to core backend infrastructure of Steam Inventory Helper project, serving 1.5M+ users by developing internal and external APIs with 300rps load.
- **Achievements:** Developed and launched 10+ projects, including 3 high-load projects, 2 of which brought in more than \$1 million for the company.

<b>Founding Fullstack Engineer</b> iGambling Development (NDA)	Jun 2021 — Jun 2022 <i>Remote</i>
---	--------------------------------------

- As product owner and developer, dedicated a 1+ year to build project.
- Architected and created an full stack MVP iGambling project single-handedly, utilizing JS/TS 20+ microservices
- Build project a template for microservices using TypeScript, Google Cloud PubSub for microservice, and PostgreSQL, resulting in improved development efficiency and development speed by 40%
- Pioneered 10+ unique games using JavaScript/TypeScript, and more 6000+ partner-provided games via API collaboration, enhancing platform diversity and user engagement.
- Connected over 10+ payment systems and 2 blockchains (web3 deposits, metamask) into platform, enhancing transaction capabilities and user experience.

- Produced affiliate network platform utilizing Nuxt/Vue, resulting in over 100 partners joining within first few months, boosting company's partner base.

## Fullstack Engineer

Oct 2014 — Sept 2015

MDK (Now MAIN Community)

*Moscow, Russia*

- Launched features for a Russian Social Media with 3M+ subscribers using PHP, JavaScript and Python, leading to growth up to 10% in user engagement.
- Solely managed LAMP stack for gaming projects, started SaaS tool to reducing spam comments on VK social networks (like Facebook), resulting in 90% reduction in spam comments.
- Engineered fullstack (frontend and backend) for pioneering CS:GO jackpot website utilizing Steam API, facilitating first-ever in-game skin gambling with 1m+ players

## EDUCATION

---

**Bachelor of Computer Networks**, Immanuel Kant Baltic Federal University
